PROFESSIONAL SUMMARY

Java Backend Developer with hands-on experience in Spring Boot and REST API development. Skilled in microservices architecture, MySQL, and Apache Kafka, with a strong focus on building scalable and maintainable backend systems. Proficient in writing clean, testable code with JUnit 5 and Mockito.

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript, HTML5, CSS3, C++

Frameworks: Spring Boot, Spring Security, Hibernate, JDBC, Servlets, JSP

Backend: REST API Development, Microservices Architecture

Testing: JUnit 5, Mockito, API Testing, Manual Testing, Debugging

Tools & Tech: MySQL, Apache Kafka, Docker, Git, Postman, IntelliJ IDEA, WordPress

PROJECTS

Microservices Backend System – Pay Stream

Tech Stack: Java, Spring Boot, Microservices, Apache Kafka, MySQL, JUnit 5, Mockito, Docker, Postman

- Developed and maintained multiple Spring Boot microservices within a Service-Oriented Architecture, enhancing system scalability and modularity.
- Built a modular payment integration layer using Factory Design Pattern, improving code reusability across multiple client configurations.
- Optimized MySQL queries and JPA mappings through indexing and query tuning, improving API response time and database performance.
- Implemented Global Exception Handling and centralized logging, enhancing API stability and streamlining production troubleshooting.
- Designed transaction processing and webhook handling for real-time async updates using Apache Kafka, ensuring reliable message delivery.
- Built unit and integration tests using JUnit 5 and Mockito, maintaining high code coverage across critical modules.
- Tested and validated REST APIs using Postman, ensuring correctness, scalability, and production readiness.

Complaint Management System

Tech Stack: Spring Boot, Spring Security, RESTful APIs, MySQL, HTML5, CSS3, JavaScript

- Developed secure RESTful APIs using Spring Boot and Spring Security with Role-Based Access Control.
- Implemented secure login, password reset, and full CRUD operations with seamless frontend integration.

Payment Integration System

Tech Stack: Spring Boot, RESTful APIs, MySQL, HTML5, CSS3, Bootstrap

- Developed backend REST APIs for transaction management with advanced filtering by date and amount.
- Built a user-friendly responsive UI using HTML, CSS, and Bootstrap.

Shipping Agency Website

Tech Stack: HTML5, CSS3, Bootstrap

- Designed a fully responsive UI for shipping services including login and signup flows.

EDUCATION

Bachelor of Engineering (B.E.) – Electronics & Communication Engineering 2018 – 2022

VSM's SRK Institute of Technology, Nipani | Visvesvaraya Technological University, Belagavi

CGPA: 8.0 | **Academic Achievement:** Ranked in Top 3% of the engineering class

CERTIFICATIONS

- Java Full Stack Development Certification | Fusion Software Institute, Pune
- Web Development Internship Completion Certificate | SV Mind Logic, Nipani
